**taiken** (tengu collective; st. gallen) is a dj, producer and soundsystem operator who shows us his personal gems in the realm of vintage dub and advanced dubstep. in order to properly evolve his trademarks bass, drums, space, roots & future, he founded the "tengu collective". this crew of skilled enthusiasts domiciled in st. gallen built the highly praised "tengu soundsystem": it's two bulky towers of powerful, bass-heavy loudspeakers that can be assembled either on out- or indoor dancefloors and guarantee a sonic experience that is quite unparalleled. actually, one day after this show, this soundsystem can be witnessed at zürich's first dubtopia edition! - again, we welcome a streetartist that paints live on the walls of our tree park studio during this show: it's no one else than **brainfart** from zürich!
