gaspard de la montagne (creaked rec.; la chaux-de-fonds) is the producer of the much-loved and everything else than run-of-the-mill „pôle ep”, released on creaked records. his provenance lies in bass music, but currently he’s much more leaning towards techno. this implies that his sounds are deeply bass informed and versatile. as his name indicates, gaspard is coming down from high-lying grounds: we’re curious what he tells us about the life of a dj and producer in the francophone, watchmaking metropolis la chaux-de-fonds. ...techno(logy) rules, we suppose!
