hailing from the swiss captial berne, **heiko** (ir/or; bern) got involved with its lively underground culture scene a couple of years ago. together with his friend jeremias, he's currently running the ir/or event label. we are appreciatively connected to him through one of the most crowded and delicate event we were ever part of: the as legendary as wicked tdf 2013 (www.youtube.com/watch?v=qo8nisorywu), where the splendid dubtopia crew contributed one of the most powerful and consistent trucks. heiko's musical interests cover the intersection of rough techno and house, leaning towards left-field, up tempo and percussion: obviously a perfect fit for comfortnoise podcast. welcome!
